

SUZUKI RM-Z 250

(2008 - 2009)

SLIP-ON EXHAUST SYSTEM

www.akrapovic.com

This Akrapovic Slip-On partial system is designed for recreational riders of the RMZ. Riders who are looking for a highest performance system should see our Akrapovic Racing and Evolution complete systems. The Akrapovic Slip-On is an excellent combination of quality workmanship, performance and affordability. For the European and other non-US markets it is equipped with a built-in noise damper, and for the American market it comes with an approved spark arrester.

PERFORMANCE

Measurements of the Akrapovic SLIP-ON system on the SUZUKI RM-Z 250 (with muffler insert):

Power & Torque: the Akrapovic Slip-On system offers a significant increase in the performance of the Suzuki engine. The improvement can be felt in the middle and top ends of the rpm range, with increases in both power and torque. At 11600 rpm we measured 34.6 HP, with max. increased power of 1.6 HP at 10700 rpm.

CONFIGURATION

The system is composed of a flared stainless steel link pipe which is welded to the muffler. It is attached to the stock header assembly with a sleeve joint secured with a metal clamp. The muffler outer sleeve is made of titanium, while the inlet cap, outlet cap and perforated inner sleeve are made of stainless steel because of the weld with the link pipe. The muffler is attached to the frame with an Akrapovic offroad carbon-fiber clamp. It is designed for two markets: for the European and other non-US markets it is equipped with a built-in noise damper, and for the American market it comes with an approved spark arrester.

	PERFORMANCE		
	stock	AKRAPOVIC	max. increased power
max. rear wheel power HP / rpm <small>(measured on Dynojet ATV)</small>	34.1 / 11680	34.6 / 11600	1.6 / 10700

	CONFIGURATION
